

Accreditation

Ensure compliance with national, local and self-generated standards with the Datix Accreditation module

PowerHealth Solutions

Driving hospital efficiency

in partnership with

Datix

Software for Patient Safety

You can efficiently distribute assessments and gather compliance scores at multiple levels of the organisational structure to provide a clear and comprehensive picture of your organisation's strengths and areas for improvement.

A flexible approach

The Datix Accreditation module has been built to provide significant flexibility, enabling it to handle many different types of standard or assessment – each of which may operate at different levels of the organisation. The extensive configurability which users will have experienced through use of other modules in the Datix suite is extended to the Accreditation module, enabling you to have the system match your own process and data capture requirements.

User engagement

Configurable levels of user access allow you to push ownership of standards and assessments out to staff across the organisation's hierarchy, distributing responsibility while retaining control of assessments and the timescales within which they must be completed. User involvement can range from answering simple individual questions as part of an assessment through to managing and controlling assessment activity for entire sections of the organisation. Simple and intuitive navigation tools ensure that users can easily find their way to the information they require.

About PowerHealth Solutions

PowerHealth Solutions is an Australian IT company specialising in patient safety, healthcare costing, and patient billing. We are the exclusive Datix distributor for Australia and New Zealand.

With many international clients, we have a very strong customer base in Australia and New Zealand, which includes public hospitals, State Health Departments and District Health Boards, and private hospitals.

ISO 9001 accredited since 2001, we are highly experienced at software implementations, with skilled resources to ensure that our systems are up and running quickly for a rapid return on your investment.

About Datix

Datix is a global supplier of software for patient safety, improving quality, risk management, incident and adverse event reporting.

We aim to help healthcare organisations build a culture and practice that drives excellence in patient safety.

Datix customers number among some of the world's leading healthcare providers. In the UK, more than 75% of the NHS uses Datix. We have a proven track record in very large, system-wide implementations in the USA, Canada and Australia, as well as some significant hospitals in the Middle East and Europe.

Powerful reporting tools

Like other Datix modules, the Accreditation module offers a reporting tool which is both simple to use and incredibly well equipped, providing users at all levels with the ability to identify gaps in compliance in their area. Peer comparison reports show how different sections of the organisation are performing; current status reports show progress as the organisation works through the assessments; completion level reports allow users and managers to see how far they have progressed in the assessments assigned to them.

 Software for Patient Safety

The powerful reporting features delivered with this module allow you to cut across the organisation and assessments to identify gaps that may not be apparent through simple aggregation of compliance scores for sets of assessments. Performance can be tracked across assessment periods to demonstrate improvement and prove the benefits of a formal, structured approach to the management of compliance standards.
